- * Summary

THE SAFE WEIGHT PROJECT

Practical advice for caravan, trailer and horse float owners.

Caravan Safety Benefits

- Peace of mind travel
- Tailored information package
- Increased safety information
- Follow-up service

The Safe Weight Project –

Practical advice for caravan, trailer and horse float owners.

The Right Weigh Mobile Weighing Service specialises in providing accurate weight measurements for both vehicle and towed trailer. Road Safety is promoted through information and education, preventing crashes related to overloaded vehicles. The major problem of overloading a towed vehicles is the compromise to the safety of the vehicles and the occupants of the towing vehicle and can contribute to crashes and also fatalities. Additionally, exceeding weight limits can result in a fine which is \$439(NSW) and a loss of three points for exceeding the plated ATM and penalties from regulatory authorities. Driving without insurance is illegal. Driving an overloaded vehicle invalidates insurance.

(This section refers to caravans but is equally applicable to trailers and horse floats)

Services Offered: A multi-stage/station process is utilised in providing the vehicle and caravan weighing service. Weigh Day will be conducted on either a Saturday or Sunday on nominated dates and locations.

Contact us to reserve your time for this Service.

- We respond with a confirmation email, providing forms which will allow us to secure details of your vehicles to be able to provide an accurate service. These must be returned prior to the date of your booking.
- On receipt of these details an individual profile is prepared for your service, which is confirmed on arrival.
- Vehicle weighing, this includes measuring both the total weight and individual axle loads to ensure compliance with manufacturer specifications and legal limits.
- Caravan weighing will provide caravanners with accurate measurements of their caravan's weight, including the weight distribution across different axles and the tow ball mass exerted on the tow vehicle.
- Consultation, In addition to providing weight measurements, we will offer consultation services to help caravanners understand the implications of their weight readings. Our experts will provide recommendations for optimising weight distribution and ensuring safe towing practices.

Comprehensive Report

The Right Weigh will provide a report on site, detailing the weight measurements for both the car and caravan, along with any relevant recommendations or observations.

This project provides cost effective access to reliable and convenient weighing facilities, leading to certainty of compliance to regulations as well as increased knowledge of safety.

Yass Valley is an RV and Caravan friendly town a decision which has increased visitors to our town and as such there is great value of promoting safe Caravanning in our LGA. Yass Valley Council support local businesses by working in partnerships to offer this community service.
